

Mesmerizing and Sure Shot Applications of iPad

The iPad has been the talk of the town for quite some time and still continues to rule the market with its spellbound charm. The one feature which makes the unit stand out, is its ability to run with any iPhone and iPod application on it. With most of iPhone and iPad applications compatible enough to work on iPad's interface, this has become an additional advantage in its success story.

Below are some applications from the popular category of Apple's App Store.

SmartNotes:- This application is best for enterprises. SmartNotes is an application that works smartly. It is ideal for making entries on daily basis, from creating and organizing notes to saving appointments and more. This application is available for free, thereby most people are attracted to it.

Twitterific:- This application's user speaking version is already available for free to iPad users; whereas the paid version costs 4.99 U.S. Dollars. This application's attribute is to help in **tracking** the updates in order to respond quickly. Twitter is fun to use directly from the iPad, which makes all operations simple and easy-to-use.

WifiTrak:- WifiTrak is one the most popular application. As the iPad is Wi-Fi enabled, this application runs smoothly therefore it's price is 0.99 U.S. Dollars which works on iPhones and iPads. WiFiTrak helps you to search open WiFi spots and public access points easily. The application works in areas of wireless devices and networks and those with availability. The quality part depends on the network itself and not on the application. WiFiTrak comes with a very simplistic user interface so its easy for anyone to use.

Evernote:- It is another ideal application for iPad users which create, manage and organize notes. Somewhat similar to Microsoft's OneNote application. EverNote has a powerful content capture, real-time search, the label classification function; supporting a large collection of images within the text, and with graphics and handwriting recognition.

Pandora:- The best available music app for Apple iPad is Pandora. The application provides a wonderful listening experience with complete clarity and quality sound, which simply soothes our ears. This fantastic application is compatible with both, iPhone as well as iPad.

TomTom USA:- The application is available for 59.99 U.S. Dollars. TomTom USA is compatible with Apple iPhone but its smooth functions and graphics will be easier and fun to view on a larger display.

Zagat to Go:- Zagat to Go is not a free application. You need to buy it for 9.99 U.S. Dollars, also, spending all the money on this application will be worth. Zagat to go gives information of restaurants, shopping malls, entertainment guide, and information on more than 70 cities around the world. Specific features include: covers 65 categories, supports advanced search capabilities, is precise in finding the data you want, can create and save personalized favorite list and is capable of tremendous other functionality.

Google Earth:- With Google Earth on your iPad, you can travel all around the world visually, turning every moment into an exciting one. For the clear graphics and touch ability of the iPad and iPhone, makes viewing an enjoyable experience. You can move the globe with the sense of touch. This application is on deck for free.

WeatherBug:- The WeatherBug application gives out an approximate information of the weather. The application is designed keeping iPad users in mind. The zipcode settings can be customized and displayed with the local temperature on the desktop, all this will include the current weather conditions, future projections and even the weather radar images. Get all this and more from a free application.

iwallet:- The iWallet is up for grabs at 4.99 U.S. Dollars for iPad users. The applications, for the time has made use of biometric technology for keeping a record of finger prints or face recognition or voice recognition, etc to verify the user. Hence, the innovative app deals with the crucial aspect of security.
